6. SCORING

6.1 QSO Points

There are four possible relations between stations foreseen: QSO between NONPMC station and NONPMC station, QSO between PMC station and NONPMC station, QSO between stations from different PMC reference, and QSO between stations within the same PMC reference. Depending on relation, different number of points is delivered.

NONPMC – NONPMC (QSO between NONPMC station and NONPMC station)

Each station receive 5 points for QSO

PMC – NONPMC (QSO between PMC station and NONPMC station)

PMC station receive 5 points for QSO, while NONPMC station receive 25 points for QSO.

PMC X – PMC Y (QSO between stations from different PMC reference)

Each station receives 10 points for QSO (X and Y stands for three letter abbreviation of PMC reference).

PMC X – PMC X (QSO between stations within the same PMC reference)

Each station receives 5 points(X stands for three letter abbreviation of PMC reference).

Table of points for QSO:

Station A	Points A	Station B	Points B
NONPMC	5	NONPMC	5
PMC	5	NONPMC	25
PMC X	10	PMC Y	10
PMC X	5	PMC X	5

6.2 Multiplier

The multiplier is the total of different PMC references contacted on each band on CW, plus the total of different PMC references contacted on each band on SSB. Each PMC reference counts only once for each band and each mode worked.

Table of QSO points with multipliers.

Station A Points A Multiplier Station B Points B Multiplier

Station A	Points A	Multiplier	Station B	Points B	Multiplier
NONPMC	5	NO	NONPMC	5	NO
